

THE NEXT GENERATION OF ELECTRIC FIRES

INTRODUCING THE VISION E-LINE VEL90.

The VEL90 is part of a new range of contemporary electric fires brought to you by the Vision brand of fires and fireplaces.

These stunning appliances are the ultimate home investment and are available in wall mounted or floor standing options.

This exciting appliance comes in panoramic as standard but can be transformed to a corner or front facing appliance with the clever use of a conversion kit - included at no extra cost making it one of the most versatile fires available.

The new collection has a range of exquisitely designed suites available in a variety of materials designed to suit every interior.

The appliance can also be installed with a fabricated chimney to give customers a truly trimless finish, alternatively they can be installed against a flat wall without the need for a chimney or any additional building work when accompanied with a suite.

The fires are ERP compliant and have a heat output range of 0.75Kw – 1.5Kw.

FEATURES AT A GLANCE.

- Panoramic as standard with conversion kit to convert to corner or front facing
- IR remote control operated
- Fully ERP Compliant
- Thermostatic control option
- Timer operation function
- LED Flame effect
- Wall mountable, supplied with brackets
